

SPECIFICATION

SILVER LASER | 2D/3D | Gain 2.4

 Maximum size: 10,50m of height and 21,00m of width

 40° half gain angle.

 The high light dispersion provides large half gain angles.

 Flame retardant fabric

 High bright and contrast for 4K projection

 Screen for Laser and Xenon Projectors.

 0,45mm thickness fabric.

 100% approved in laser projection with zero speckle effect.

 Excellent image on both 2D and 3D with ghosting effect near zero.

 Mini perforation. Due to the mini perforation and the density of the coating the sound passes through the fabric easily.

 Packaging in carton tube, inside iron tube 4”.
