

SPECIFICATION

NEW SILVER LASER 2.4

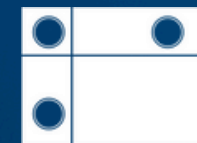

Maximum size 10,60m height x 20,00m width.

0,30mm thickness, very light weight, 300 gr / sqm.

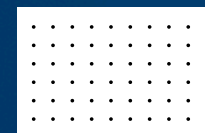

High light dispersion provides wide optimal viewing angles.

Double eyelets, high strength.

Excelent image and colors in both 2D and 3D.

Due to the miniperforation and the thickness of the fabric 0,30mm the sound passes through with 18% more efficiency.

Laser projection approved, zero speckle effect.

Packaging in carton tube, inside iron tube 4”.
